Prikaz stvarne kartice zadatka na mapi ili u listi poslova koja demonstrira usklađenost svih ikonica.

UPUTSTVO ZA CHATGPT / MIDJOURNEY GENERISANJE

Kako da generišete nove ili izmenjene ikonice za USKOČI?

Kada u ChatGPT unesete zahtev za novom ikonicom (npr. čišćenje snega, baštovanstvo, električar, transport klavira), iskopirajte sledeću univerzalnu formulu kako bi se nova ikonica savršeno stopila sa postojećim 2.5D glinenim stilom aplikacije:

UNIVERZALNI MASTER PROMPT:

```
A tactile 2.5D claymorphism icon representing [OPIS OBJEKTA, npr. an electric drill and
screwdriver / garden shears].
Smooth matte clay texture with soft rounded bevels and friendly tactile proportions.
Color palette: rich emerald green (#006B4F), warm amber orange (#FF7A1A), crisp soft white
and muted warm stone gray.
Lighting: gentle studio key light from top-left, soft ambient occlusion, subtle grounded
```

```
contact shadow underneath.
Angle: isometric 30-degree perspective tilt.
Strict requirement: isolated on a clean 100% transparent background (alpha channel), no
background square, no frame, centered, 4k render.
```

✓ Šta uvek naglasiti:

2.5D claymorphism, matte clay texture, rounded smooth bevels, soft ambient light, transparent background, emerald & orange accents.

✗ Šta strogo izbegavati (Negativni prompt):

Glossy glass, shiny chrome reflections, harsh neon colors, sharp knife-like edges, photorealistic human faces, solid colored backgrounds.
